ABSTRACT

Enrollment trends for Black and Hispanic college students in the United States and the South for 1978 are examined. Statistical data and analysis indicate that there has been a considerable slowing of Black enrollment growth from 1976 to 1978 as compared to earlier in the decade. Trends among Black students, as well as for the student population as a whole, show shifts to two-year institutions and increasing part-time enrollment. In the South, the impact of these shifts appears to be greatest on the traditionally Black colleges. Blacks as a percentage of total enrollment in graduate-level science, engineering, and professional programs declined, despite some numerical increases in enrollment of Blacks in these fields. Enrollment of Whites in these fields grew more rapidly. Hispanic enrollment, which is concentrated in Florida and Texas, increased more rapidly than either Black or White enrollment, although Hispanics remain underrepresented in the student population as a whole. In 1978, this enrollment was concentrated for the most part in undergraduate programs at two-year public institutions. Data are presented by type of institution and also by state. (SW)

Black and Hispanic Enrollment in Higher Education, 1978: Trends in the Nation and the South

SREB

Southern Regional Education Board

HIGHLIGHTS

Black Enrollment

...The growth of black enrollment slowed as total black enrollment nationwide reached 1,055,964 students in 1978, a modest 2.1 percent increase over 1976 levels.

...Black enrollment in the South totaled 442,473 students in 1978, a 4.0 percent increase over two years.

...Full-time enrollment of blacks fell slightly in both the nation and the South as the number of black students attending part time increased--up 7 percent nationwide, 16 percent in the South--during the 1976-78 period.

...Graduate enrollment of blacks nationwide also declined during the 1976-78 period while remaining unchanged in the South. Blacks represented 5.8 percent of the graduate enrollment nationwide in 1978.

...The shift from part-time to full-time enrollment of blacks was most evident in public two-year colleges. In the South, these institutions saw an 8 percent decline in full-time enrollment and a 27 percent increase in part-time enrollment.

...Traditionally black colleges of the South, the largest number of which are four-year residential institutions, experienced declines in both full-time and part-time black enrollment during the 1976-78 period. Public black colleges of the South, which enrolled 109,000 black students in 1978 (1 of every 4 black students in the region), declined in total enrollment by 6.5 percent over the two-year period.

...Black enrollment increased in undergraduate business programs and engineering but declined in both biological and physical sciences. At the graduate level, blacks also registered significant increases in business programs.

Hispanic Enrollment

...Hispanic enrollment nationwide totaled 541,270 in 1978, which accounted for 4.8 percent of total enrollment. The Hispanic population of the United States was estimated to be 11 million in 1976 (5.3 percent of the total population).

...Hispanic students in the South--90 percent of whom were enrolled in Florida and Texas--totaled 115,870 in 1978.

...The majority of Hispanic students in the region were enrolled in two-year colleges (60 percent in Florida; 51 percent in Texas).

...Hispanic enrollment in 1978 was up significantly over 1976 levels--up 13 percent nationwide; 17 percent in the South.

FOREWORD

By the year 2000, 25 to 30 percent of the young people of America will come from minority group populations. Although a college education has come to be taken for granted by a large part of the majority population, higher education now promises to become a reality for the growing number of minority youth, who need its benefits as much as anyone else but who were sometimes neglected in past planning for access to postsecondary education.

SREB is committed to providing information on opportunity and participation of minorities in postsecondary education which goes beyond mere descriptive statistics. Specific attention to the progress of blacks in higher education has long been an SREB concern. For the first time, the current enrollment report also provides information on the postsecondary educational status of that rapidly expanding component of the population of at least two Southern states (Florida and Texas), namely, the Hispanics.

During the last two years, enrollment of Hispanic students has advanced by 17.3 percent. However, the proportion of that ethnic group that goes to college still lags behind its representation in the population as a whole. In Texas, for example, while Hispanics account for nearly 21 percent of the population, they make up only 12 percent of college enrollments. Future SREB analysis of college attendance in the South will continue to examine progress by the various population groups which make up our society.

BLACK ENROLLMENT IN HIGHER EDUCATION, 1978

Black Enrollment Growth Slows

Total black enrollment in the United States reached 1,055,964 students in the fall of 1978, a modest 2.1 percent increase over levels reported in the 1976 survey (see Table A). This represented a considerable slowing of the rate of growth in black enrollment experienced during the first half of the decade. Total enrollment over the two-year period increased by 2.4 percent. In the South, black enrollment was reported at 442,473, a 4 percent increase over levels in 1976. Total enrollment in the South grew by approximately 5 percent during the period.

TABLE A[1]

BLACK ENROLLMENT IN HIGHER EDUCATION
UNITED STATES AND SREB STATES
1976, 1978

	United States			SREB States		
	1976	1978	Percent Change	1976	1978	Percent Change
Full-Time	659,597	654,604	-0.8%	309,080	307,532	-0.5%
Part-Time	375,083	401,360	7.0%	116,500	134,941	15.8%
Totals	1,034,680	1,055,964	2.1%	425,580	442,473	4.0%
FTE[2]	798,348	803,107	0.6%	352,185	357,460	1.5%

[1]Note on Sources: The tables in this report are derived from the Higher Education General Information Survey (HEGIS) entitled Fall Enrollment and Compliance Report, 1978, available from the National Center for Education Statistics. The sum of racial and ethnic breakdowns may not equal total, due to the failure of some institutions to report data by race. At the national level, 18 institutions did not provide racial breakdowns (total enrollment 28,919); in the 14 SREB states, 6 institutions did not report race (total enrollment 8,953). Also, the sum of the breakdowns by level may not equal the grand total, due to nonreporting by a small number of institutions.

[2]Full-time-equivalent (FTE) enrollment.

The small increases in black enrollment were the result of a growth in part-time enrollment in both the nation and the South, as the enrollment of full-time black students fell slightly during the two-year period. The number of black students in the region attending part time increased by nearly 16 percent, compared to a 13 percent increase in total part-time enrollment. Full-time enrollment declined by 0.5 percent, compared to a slight increase among all students (0.6 percent). The result was enrollment growth among blacks on a full-time-equivalent basis of less than 1 percent nationwide and 1.5 percent in the region.

Of the 14 SREB states, Kentucky, Louisiana, Mississippi, and West Virginia experienced declines in total black enrollment from 1976 to 1978 (see Table B). Blacks accounted for 15 percent of total enrollment in the South, compared to their near 19 percent representation in the population as a whole. Blacks' representation in the college population was down slightly from levels in 1976.

Nationwide, the number of black students enrolled in graduate programs declined by 2.6 percent from 1976 to 1978 (see Table C), which also meant a reduced share of total graduate enrollment for blacks in 1978 as compared to two years earlier. In the South, the number of blacks enrolled at the graduate level was virtually unchanged. First professional enrollments in the region increased by about 8 percent over the two-year period.

Declines in Black Colleges

While the percentage of black students enrolled in predominantly black institutions of the South declined steadily over the past two decades, this was the result of increasing access of blacks to formerly all-white institutions, rather than numerical declines in enrollment at black colleges. From 1976 to

TABLE C

BLACK ENROLLMENT BY LEVEL
UNITED STATES AND SREB STATES
1978

	United States		SREB States	
	Total	Percent Change 1976-1978	Total	Percent Change 1976-1978
Undergraduate	968,059	2.4%	407,545	4.3%
First Professional	11,424	2.2	3,420	7.9
Graduate	76,481	-2.6	31,508	0.0
Totals	1,055,964	2.1%	442,473	4.0%

1978, however, the predominantly black colleges of the region (which include both the traditionally black institutions and the newer institutions in which the racial composition of the student body is greater than 50 percent black) experienced a decline of 4 percent (see Tables D and E). Black enrollment dropped in public black colleges in all but 4 of the 14 SREB states. The regionwide decline was 6.5 percent, with similar declines registered in the enrollment of white students. Private black colleges also declined but to a smaller degree (4.6 percent in the region), with the drops occurring in 8 of the 11 Southern states with private black colleges. (See the Appendix for a complete listing of these colleges and their enrollments.)

TABLE D

TOTAL BLACK ENROLLMENT IN THE SOUTH
1952-1978

	Total	Predominantly White Institutions	Predominantly Black Institutions	Blacks as a Percent of Total Enrollment in the South	Percent of Black Enrollment in Predominantly Black Institutions	Black Enrollment in the South as a Percent of Total Black Enrollment
1952	63,000	--	63,000	13%	100%	70%
1960	84,000	3,000	81,000	10	96	50
1965	134,000	24,000	110,000	10	82	49
1970	245,000	98,000	147,000	12	60	47
1976	426,000	243,000	183,000	15	43	41
1978	442,000	266,000	176,000	15	40	42

Sources: Estimates of black student enrollment in predominantly white colleges and universities for the years 1960 and 1965 are taken from those made by the Southern Education Reporting Service. Enrollment in traditionally black institutions for 1952, 1960, 1965 are derived from Fall Enrollment Reports of the U.S. Office of Education. Estimates for 1970 are made from the U.S. Bureau of the Census, Current Population reports, and the U.S. Office for Civil Rights, Racial and Ethnic Enrollment in Higher Education, 1970. Figures for 1976 and 1978 are from the Fall Enrollment and Compliance Report of the Higher Education General Information Survey (HEGIS). Predominantly black institutions are those with greater than 50 percent black enrollment. See Appendix for list.

Increases in Two-Year Institutions Among Part-Timers

Table E reveals a significant shift in enrollment of black students from full-time to part-time status. While enrollment, either full-time or part-time, changed little among public four-year institutions, public two-year colleges nationwide experienced significant declines in full-time enrollment (7.4 percent) but a 10 percent increase in part-time enrollment--enough to offset the decline and register a small gain in total enrollment. In the South, the changes were even more dramatic, with full-time enrollment in public two-year colleges falling 8.2 percent and part-time enrollment up nearly 27 percent for almost a 6 percent gain in total headcount.

Nationwide, two-year colleges enrolled 42 percent of all black students participating in higher education, compared to 34 percent of whites. In the South, 37 percent of all blacks were enrolled in two-year institutions, compared to 33 percent of whites. Private two-year colleges, a growing but still small sector of higher education (less than 2 percent of total enrollment nationwide), showed significant growth in the number of black students enrolled. This was due to the inclusion, for the first time in the HEGIS survey, of a number of proprietary institutions offering degree credit work.

Program Changes: Increases in Business Enrollments

Table F summarizes black enrollment in 1978, by selected fields, for the United States and the SREB states, and the percentage change over levels in 1976. One of the largest numerical increases occurred in undergraduate business programs (which would include both two-year and four-year programs). Black undergraduate enrollments nationwide were also up significantly in engineering, but down slightly in the biological sciences.

TABLE F

BLACK ENROLLMENT IN SELECTED FIELDS, 1978;
PERCENT OF TOTAL ENROLLMENT;
PERCENT CHANGE 1976-1978

	United States			SREB States		
	Total 1978	Percent of Total Enrollment	Percent Change 1976-1978	Total 1978	Percent of Total Enrollment	Percent Change 1976-1978
Undergraduates:						
Agriculture and Natural Resources	2,699	2.1%	-9.1%	1,699	5.1%	5.5%
Architecture and Environmental Design	2,631	4.7	1.5	911	5.2	26.0
Biological Sciences	19,674	7.6	-1.1	10,218	14.1	-3.9
Business and Management	138,746	10.5	16.6	65,411	16.7	13.9
Engineering	23,846	5.2	8.7	10,065	8.1	16.9
Physical Sciences	6,509	5.1	2.4	3,324	8.5	-4.8
Other	773,954	10.4	0.2	315,917	16.7	2.4
Graduate and First Professional:						
Agriculture and Natural Resources	239	1.3	-7.0	104	2.0	-23.0
Architecture and Environmental Design	449	4.5	-14.5	107	5.0	-18.9
Biological Sciences	1,161	2.6	-3.5	514	4.4	-6.0
Business and Management	7,745	4.2	21.1	2,318	5.9	12.5
Engineering	990	1.6	9.9	225	1.7	29.3
Dentistry	918	4.2	11.5	331	5.6	13.4
Medicine	3,571	5.3	3.1	1,129	6.3	12.0
Veterinary Medicine	147	2.0	17.6	111	5.2	20.7
Law	5,371	4.5	-1.3	1,381	5.1	-3.8
Physical Sciences	688	1.9	1.3	258	3.0	14.2
Other	66,626	6.6	-4.7	28,450	11.0	-0.4

At the graduate and first professional levels nationwide, black enrollment also increased significantly in business and management programs, as well as in dentistry and veterinary medicine. Significant declines occurred in the fields of agriculture and natural resources, biological sciences, and the "other" category which in large part represents declines in the field of education.

Even in fields where there was some numerical increase, however, there was little increase or an actual decline in blacks' representation. For example, while black enrollment in undergraduate engineering grew by 17 percent in the South, total enrollment grew even faster, and blacks actually declined as a percentage of the total when compared to 1976 levels. The same was true in the field of medicine, where blacks accounted for 5.3 percent of total enrollments in the nation in 1978 and 5.9 percent in 1976.

Explanations: Economics and Program Interests

A number of explanations for the changes which occurred during this short period can be offered but, without examining changes at individual institutions in more detail and the reasons behind student behavior, it is impossible to answer the question fully.

Shifts from full-time to part-time enrollment and from four-year to two-year institutions reflect trends observed for several years for the college population as a whole. Changing program interests--for example, from the fields of education and the arts and sciences, to occupational and technically oriented programs which are available to working students--are a partial explanation. Part-time attendance, while sacrificing eligibility for financial aid, offers the advantage of concurrent employment and college attendance, thus

off-setting or eliminating the biggest cost of going to college--income lost due to unemployment.

In 1978, full-time enrollment of black students was also negatively affected by the auditing of applications for federal financial aid, which caused a large number of rejections and delays in that particular year.

Declines in graduate enrollment among black students nationwide represent, in large part, changes in enrollment levels in education programs (73 percent of the graduate degrees awarded blacks in the South in 1976-77 were in the field of education). Enrollments in these programs are strongly influenced by changes in state certification requirements, which can cause fluctuation in short-term trends.

There are indications, however, of an overall slackening of demand for graduate teacher education programs. In 1977 and 1978, for example, the annual number of graduate education degrees awarded nationally declined after years of spectacular growth. Graduate enrollment in education, according to the Council of Graduate Schools, declined 5 percent in 1979 from levels in the previous fall. Some states have seen dramatic declines in these programs as the population of employed teachers becomes "mastered-in" and the number of new teachers hired who may be seeking graduate degrees declines.

HISPANIC ENROLLMENT IN HIGHER EDUCATION, 1978

Population and Total Enrollment

The Hispanic population of the United States numbered over 11 million in 1976 (5.3 percent of total population) according to the U.S. Bureau of the Census.[3] In the South, Hispanics totaled 3.5 million, 93 percent of whom are residents of just two states--Florida and Texas. In Florida, Hispanics (primarily Cuban in origin) accounted for 7.9 percent of the total population. The 2.6 million residents of Texas with Spanish origins (primarily Mexican-Americans) represent 21 percent of that state's total population. Only in two other states of the region (Louisiana and Virginia) do Hispanics make up more than 1 percent of total population.

The total enrollment of Hispanics in higher education nationwide rose to 541,000 students in 1978 (4.8 percent of total enrollment), up nearly 13 percent from 1976 levels (see Table G). In the South, approximately 116,000 Hispanics were enrolled in 1978 (3.9 percent of the total enrollment), an increase of 17 percent over 1976.

Table H draws comparisons at the national level between the characteristics of enrollment for Hispanics and for all students. Hispanics are more likely to be enrolled at the undergraduate level (93 percent, compared to 86 percent of all students) and to be found in two-year colleges (43 percent of all Hispanics, compared to 34 percent of all students). Hispanics attend full time at the same rate as the total student population.

---

[3]Hispanics as defined in the HEGIS surveys are persons of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race. For population data on Spanish origin persons, see U.S. Bureau of the Census, Current Population Reports, Series P-20, No. 334 (Spring 1976).

Enrollment Characteristics: Florida and Texas

The nearly 106,000 Hispanics enrolled in these two Southern states accounted for 9 of every 10 Hispanics enrolled in the region and 1 of every 5 Hispanics enrolled nationwide. In Florida, enrollment levels in 1978 (27,000 students or 7.2 percent of total enrollment) came close to approximating estimates made in 1976 of the Hispanic population's representation in the total state population (a figure which will likely increase in the 1980 census count and in subsequent surveys which can take into account the more recent immigration of Cubans to the United States). In Texas, 79,000 Hispanic students accounted for 12 percent

of total enrollment, compared to estimates of the Hispanic population in 1976 of 21 percent.

The tables of this report reveal several other important characteristics of this enrollment in 1978.

In Florida

...82 percent of all Hispanics are enrolled in public institutions, which is about the same percentage as for all students.

...60 percent of all Hispanics are enrolled in two-year institutions, compared to 51 percent of all students.

...3 percent of all Hispanics are graduate or first professional students, compared to 11 percent of all students.

In Texas

...93 percent of all Hispanics are enrolled in public institutions, compared to 87 percent of all students.

...51 percent of all Hispanics are enrolled in two-year institutions, compared to 37 percent of all students.

...8 percent of all Hispanics are graduate or first professional students, compared to 14 percent of all students.

Program Enrollments

Table I provides enrollments for Hispanics, in selected fields, from the 1978 HEGIS report. In the science, engineering, and professional fields on which institutions were asked to report data by race, Hispanics are significantly underrepresented, compared to their representation in the college population as a whole and in the general population. In undergraduate engineering, for example, Hispanics represent 1.3 percent of total enrollment; in medicine, 3.3 percent; and in veterinary medicine, 0.5 percent.

CONCLUSION

One of the significant changes noted in this report is the considerable slowing of black enrollment growth from 1976 to 1978 as compared to earlier in the decade. Trends among black students increasingly reflect those observed for the student population as a whole--namely, shifts to two-year institutions and increasing part-time enrollment. In the South, the impact of these shifts appears to be greatest on the traditionally black colleges, which are for the most part four-year residential institutions.

At the graduate level, despite some numerical increases in the numbers of black students enrolled in science, engineering, and professional programs, blacks as a percentage of total enrollment in these fields declined, as the enrollment of whites grew even more rapidly. Blacks in most graduate and first professional fields, except education, remained significantly underrepresented relative both to their numbers in the population and to their numbers in undergraduate programs.

Hispanic enrollment is becoming an increasingly important factor in colleges and universities of the region. Concentrated in the two states of the South with a substantial Hispanic population--Florida and Texas, numbers of Hispanic students are increasing much more rapidly than either blacks or whites, although they remain underrepresented in the student population as a whole. In 1978, this enrollment was concentrated for the most part in undergraduate programs at two-year public institutions. But, as the college-age population of Hispanics grows and participation rates increase, a more diverse set of higher education institutions in other parts of the South can expect to see increases in the enrollment of Hispanics.
